A User's Report On The Hewlett Packard OfficeJet Product 5610 All-In-One Printer, Copier, Scanner And Fax

Smaller businesses, where the competition for machine-time regarding the different features is not very intense, will find that all-in-one office applications are a great solution. But bigger businesses also find them useful, especially if the offices are found in out-of-the-way places. The technology available today assures peace of mind regarding the handling and reproduction quality of documents, added to overall functional reliability. Laserjet and inkjet printers will be the two more generally available options. Your budget normally decides the most suitable solution. For small businesses that is the biggest aspect to consider, but it also applies to larger concerns, but usually not to the same degree. In this article we will assess an all-in-one system for printing, copying, scanning and faxing needs - the HP OfficeJet 5610.

Documents of a professional standard will definitely be well within the capability of the 5610. The resolution is a standard 4800 x 1200 DPI (dots per inch) for color printing which constantly produces a photo quality look for any need you may have. The option of six ink colors creates even more scope for printing in color, if you require it. You can print using the Black & White setting with a maximum resolution of 1200 x 1200 DPI. You can create 20 black and white pages each minute (PPM) on a 5610 and 13 PPM can be obtained for color prints. And what's very advantageous in confined office spaces is that this machine is fairly small.

The standard scanning resolution is fixed to 1200 DPI regarding both documents and images. When creating images and color documents that is in all probability too little. Fortunately you are able to enhance the resolution utilizing software that comes standard with the 5610. This allows the resolution to be raised to a substantially increased level of 19,200 DPI. The scanner of the HP 5610 has a colour range of 48 bits. That is going to give you additional improvements in the professional output of your images.

Additional capabilities incorporate copying as much as one hundred copies maximum without having any additional input from the user. Scaling can certainly be essential when creating copies. The copy scale element runs from 25% up to 400% for greater sizing. There are quite a few smaller companies, together with individual business owners, who engage in fax blasting which is similar to email spamming. The OfficeJet 5610 utilizes their patented blocking technology to protect against fax spam from getting through. That is without a doubt an excellent feature for the reason that it saves you time and money lost on printing. In addition, your network and also phone lines will not be tied up with constant fax spam.

As you would expect, the HP OfficeJet 5610 works with the standard computer architecture, Windows and Mac. The HP 5610 works just fine with Windows Vista. With proportions of around 17 x 16 x 9 inches, the OfficeJet 5610 is actually a space-saver. We are positive you will be in a position to find a home for it somewhere within your office. The Hewlett Packard label has been well recognized for decades, and you can feel comfortable at least considering the 5610 for your business office needs.
